# Don't M.I.S. "The Bizson Concept"

### From quick scan to management tool

• What ever the industry the basics and principal indicators remain the same:

- Machines
- Raw Materials
- Human Resources
- Concept
- Product

• The aim – to create added value in an efficient and profitable way:

- Efficiency
- Productivity
- "Plant load"
- Optimisation

### • Machines:

- Kg, meter, litre, m<sup>2</sup>, joule, mileage ...
- Speed
- Usage /consumption
- Downtime
- Breakdowns
- Labour required
- Loss
- Others (elongation, shrinkage...)
- Algorithm

### <u>Raw Materials</u>

- Blends, mix
- Material loss
- Material specific behaviour
- Price concept
- Machine impact / specifics
- Characteristics
- Constructions (A ABA AB)
- Algorithm

### The "Human" factor

Headcount/payroll
Wage rates / all-in cost/hour

Efficiency
Productivity (absenteeism,...)
Holiday planning

Flexibility (shift / night / weekend)
Effectiveness (work/presence)

Algorithm

### • The concept:

- Raw Materials, Machines, Human resources
   => product
- Only through the "CONCEPT"
- Amalgam of algorithms in line with the typical reflections of the industry – research – fine tuning – the local "flavour"
  - The Centre of "ALGORITHMS"

**Offset Printing** 

Wall to Wall Tufting

Logistics 3 PL/4 PL

**Injection Moulding** 

#### **Floor Lamination**

Thermoforming

#### **Rolling of Aluminium**

**Yarn extrusion** 

**Aluminum Extrusion** 

**Meat Production** 

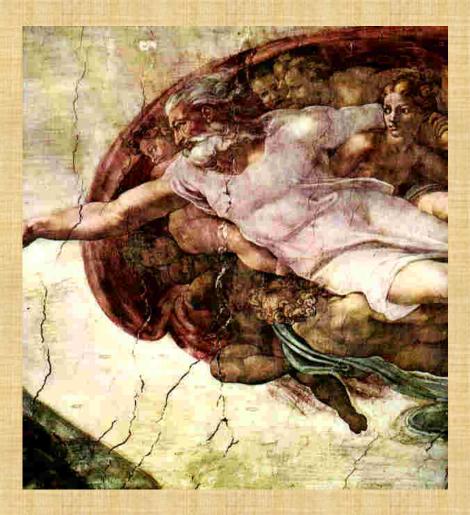

Rotogravure

• What ever the industry the basics and principal indicators remain the same:

- Machines
- Raw Materials
- Human Resources
- Concept
- Product

• The aim – to create added value in an efficient and profitable way:

- Efficiency
- Productivity
- "Plant load"
- Optimisation

### **The Outcome**

- Interaction
- Full integration
- Individual costing
- Margin analysis by customer/product
- Capacity review Machine Load
- Full occupancy target Plant Load maximization
- Optimum environment
- Immediate bottom-line calculation
- "The SUMMUM"
- Linked with "WHAT Ever"
- The "Ultimate power"

### **"The Bizson Concept":**

No limitations towards what ever industry - just describe: Methodology – Concept - Product – Market Customer – Components)

Bottom line (Top down/Bottom Up) Result in an open "What If" environment

The subscreen we have been and the second share a second second

### **The solution comes in 3 modules:**

- **Budres** (a budget in a minute)
- Simres ("What if" in a second)
- **Perres** (The periodic result immediately)

"FLY with the EAGLES, Breed your FUTURE"

The "concept has already been implemented in:

- "Rolling of aluminum"
- "Carpet Weaving" / "Upholstery"
- "Injection Molding packaging horticulture"
- "Thermoforming classic/rolling (plastics) packaging
- "Label Printing (wet glue / PSL Helio / offset)"
- "Tufting" / "Vinyl" / "Laminate"
- "Retail" / "Mass Retail" / "Wholesale"
- "Food-processing" (ham/prepared dishes/...)
- "Yarn Extrusion (Nylon / PP / PE)"
- "Wool fabrics" / "Wool dyeing"
- "Transports Logistics 2/3/4 PL"
- "Aluminum Extrusion Profiles"
- "Foil extrusion"

•

...

• "Building supplies" – raised floors / production
